

Lab Report Requirements

- 1 – Must use 12 pt Times New Roman or other Serif font, no Sans Serif fonts. Please remember to check grammar and spelling.
- 2 – This is still a technical report, so make sure to include an Introduction/Purpose, Body, and Conclusion:
 - Intro/Purpose – What is this lab about, what will you be doing?
 - Body – How did you approach each task? What tasks were completed, what tasks failed and why?
 - Conclusion – What did you learn? What would you do differently?
- 3 – Diagrams and Tables:
 - Make sure all figures and tables are numbered labeled properly. Don't forget to reference them in your work.
 - If a single figure or diagram, or a combination thereof, takes up more than a half page, place it (or them) in an Appendix!
- 4 – Have a separate appendix for each of the following:
 - a. Block diagrams – must be labeled using names from code
 - b. ASM/Bubble/CU logic table
 - c. Source code
- 5 – Headshots and description of self. Go ahead and have fun here. All professional reports require a headshot and description of the author(s), might as well get used to it now.
